IDENTIFIERS	*Oregon

ABSTRACT

This document presents 37 tables showing the Oregon college choices of 1997 Oregon high school graduates by county and high school. Two summary tables are provided. The first shows 1997 high school graduates admitted in 1997 to Oregon colleges by county of origin and type of college. Out of a total of 30,330 graduates, 12,762 enrolled in Oregon colleges. The second summary table, for the years 1986 through 1997, gives data for Oregon high school graduates admitted by Oregon colleges in the fall following their graduation. Trend data indicate that a decreasing percentage of total graduates are attending the Oregon University system, a greater percentage are attending community colleges, with the percentage attending independent colleges remaining constant. The remaining tables detail, by county and individual high school, the number of high school graduates attending each Oregon college, as well as the number of high school graduates at each high school and the percentage of each high school's graduates attending each college. An index to Oregon high schools is also provided. (DB)
